TERRAIN PARK DAILY INSPECTION CHECKLIST

A printable checklist for the park crew's morning inspection: every feature, every landing, the signs, and a daily record that shows what was open and what was checked.

THE DAILY CHECKLIST

One sheet per park per day. Repeat the feature section for each feature, or keep it on a phone with the park map.

THE PARK AS A WHOLE

- ☐ **Entrance signs** in place: the park's rules, its freestyle terrain sign, and the Park SMART messages
- ☐ **Feature size signs** match today's layout (small, medium, large lines)
- ☐ **Boundaries and closures** roped and signed; closed features clearly marked closed
- ☐ **Visibility and light** good enough to judge landings and takeoffs
- ☐ **Snow surface** after grooming: no hard ice, ruts or holes on approaches and run-outs
- ☐ **Spacing** between features enough to stop and to see the next one

EACH JUMP

- ☐ **Approach** smooth, with enough room to set speed
- ☐ **Takeoff** shape and lip as built, not worn into a kicker or rutted
- ☐ **Knuckle and landing** soft enough, long enough and free of holes
- ☐ **Run-out** clear, with room to stop before the next feature

EACH RAIL, BOX OR JIB

- ☐ **Structure** solid and level, not shifted overnight
- ☐ **Surface** smooth: no burrs, sharp edges, loose bolts or damaged caps
- ☐ **Ends and supports** buried or padded as built; no exposed metal at the ends
- ☐ **Takeoff and landing** snow built to the feature's height

HALFPIPE OR QUARTERPIPE, IF YOU HAVE ONE

- ☐ **Walls and transitions** cut as intended, without ice or chunks
- ☐ **Deck and lip** clear, with the deck edge marked where riders stand

Park _____ Inspected by _____ Date and time _____

WHAT THE DAILY RECORD SHOULD SHOW

The record is the day's park, as it was. For each feature: where it was, its size, its status (open or closed), who inspected it and when, and any problem found with what was done about it. Changes during the day (a feature closed at 1 p.m. after the landing went hard) go in the same record with the time.

Keep past days as they were written. If a correction is needed, add it with a note and a name rather than changing the original. Weeks later, that record is the only reliable picture of what the park looked like.
